TAIVAN ESTABLISHES COMMISSION TO CONTROL PRODUCTION

The Taiwan Productive Enterprises Control Commission has been established by the Provincial Government to achieve unified control over the entire province's production. Herafter it will act as central administrator of the following:

- 1. National enterprises in Taiwan directed by the National Besources Commission (petroleum, gold, copper minig, lead marufacture).
- 2. Mational-provincial enterprises managed jointly by the Mational Resources Commission and the Taiwan Provincial Government (sugar, fertilizer, cement, shipbuilding, machinery, paper, electricity, coal mining).
- 3. Provincial enterprises regulated by the Taiwan Provincial Government (coal mining, iron, pottery, textile, chemical, engineering).

Governor Chien Chieng will probably assume chairmanship of the commission. Leaders in each enterprise and several others to be appointed by the Provincial Government will comprise its mashership.

The cummission will have the power to hire and dismiss all important personnel in the various enterprises. It will also take over functions and marily handled by boards of directors and examiners. Interests and dividends from shares in enterprises on Taiwan to which the Central Government is entitled will be put into the Trivan branch (Bank of Taiwan) of the national treasury.

With the creation of this commission, the Mational Resources Commission will no longer direct industries on Taiwan which were originally under its jurisdiction. This further confirms the independent economic position of the island province.

Formation of the Commission for the Disposition of Central Government Goods on Taiwan was announced at the same time. It will handle surplus commodities sent to the province by the Central Bank and the Supply Commission of the Executive
